Benesure Reduces Underwriting Time with AURA® From RGA Technology Partners, Inc.®

Orlando, Florida/USA, May 18, 2009 — RGA Technology Partners, Inc. a wholly-owned subsidiary of Reinsurance Group of America, Incorporated (NYSE:RGA) today announced that Benesure Canada has launched its use of the AURA® Product Suite in Canada. AURA (Automated Underwriting and Risk Analysis) helps automate underwriting decisions, speeding up the time to issue a policy and greatly improving the data gathered about an applicant. Benesure Canada is using AURA to help mortgage brokers and lenders across Canada who use them to underwrite mortgage life and disability protection. Benesure found out about AURA through the Canadian reinsurer, RGA Canada Re.

“Benesure’s addition of AURA is part of a new trend we are seeing where carriers are using the product through an outsourcing service provider,” said Jym Barnes, President and Chief Executive Officer, RGA Technology Partners, Inc. “We are excited to be working with Benesure in this kind of environment. Their industry expertise and high level of client service is something we are very proud to be a part of.”

“Our clients are our focus, so anything we can do to improve our service to them is important.” said Tina Bellavia, Vice President, Mortgage Broker Product Management and Operations, Benesure. “On the day we launched, AURA proved itself, helping us underwrite an applicant (that previously would have taken days) in just a matter of hours. Our goals are continuing to be met. We are thrilled to watch AURA streamline our processes and improve our time service for clients.”
